

Akbolat Sadvakassov

Senior Android Software Engineer

amaterasusan96@gmail.com | Almaty, Kazakhstan | [linkedin.com/in/akbolat-sadvakassov](https://www.linkedin.com/in/akbolat-sadvakassov) | github.com/iRYO400 | sadvakassov.com

PROFESSIONAL OVERVIEW

Senior Android engineer with 9+ years building production apps across fintech, banking, and graphics. Currently shipping features for a banking app serving 50M+ users in a 3,000+ module codebase with 10,000+ automated tests. Strong across the modern Android stack — Kotlin, Coroutines/Flow, Jetpack Compose, Clean Architecture, MVI/UDF. Former Team Lead (8 engineers) and Tech Lead, focused on mentoring, shipping flagship products, and improving testing, tooling, and CI/CD.

WORK EXPERIENCE

Android Software Engineer | Tinkoff (T-Bank), Almaty, KZ

FEB 2024 – PRESENT

- Work in the Smart Investments domain, shipping user-facing features and contributing to shared platform code in a large multi-module Kotlin/Compose codebase.
- Led an effort to improve test reliability and CI speed across my team's modules: raised coverage ~33%→47%, cut the modules' CI run-time ~50%, and reduced Mockito usage ~90% via hand-written stubs.
- Built internal developer tooling used daily by 100+ engineers, including global keyboard shortcuts for the debug panel (replacing a 4-step flow) via a custom Window.Callback.
- Delivered user-facing screens and features end-to-end in Kotlin + Jetpack Compose on MVI architecture, across unfamiliar cross-team codebases under deadline.
- Integrated an internal AI agent to automate recurring service tasks.

Stack: Kotlin, Coroutines, Jetpack Compose, MVI (UDF) architecture

Software Engineer → Tech Lead | VistaCreate, Remote

OCT 2021 – APR 2023

- Worked on a cross-platform graphic editor; promoted to Tech Lead during tenure.
- Migrated Google Play Billing from v3 to v5.
- Built editor pages running multiple simultaneous ExoPlayer instances in Jetpack Compose.
- Implemented A/B-tested paywall variants to improve subscription conversion.
- Set up CI/CD with Firebase App Distribution.

Stack: Kotlin, Coroutines, Clean Architecture, MVI/MVVM, Jetpack Compose, Koin, Coil, Play Billing, GitLab

Software Engineer & Team Lead | One Technologies (Forte Bank), Almaty, KZ

JUL 2020 – OCT 2021

- Led an Android team of 8 engineers on a fintech superapp for Forte, one of Kazakhstan's leading banks; mentored interns.
- Delivered flagship banking products — Cashback, Loans, and Installments.
- Advocated for and prioritized tech-debt reduction with product managers.

Stack: Kotlin (Coroutines/Flow), Clean Architecture, Jetpack (MVVM, Navigation, Room, WorkManager, Paging), Koin, GitLab

Software Engineer | UMAG (Khan Group), Almaty, KZ

OCT 2018 – JUL 2020

- Built a POS app from scratch with dynamic UI for phones and tablets for UMAG, a leading trade-automation system in Kazakhstan — a pure-Java app with 50 screens, under 10 MB.
- Set up CI on GitHub Actions from scratch.
- Wrote thousands of unit tests, reaching 60% code coverage.

Stack: Java 8, Kotlin, AndroidX, DataBinding, Room, Retrofit2, Koin, Coroutines, JUnit4, Robolectric, Mockito, Espresso

Software Engineer | AvtoVse.kz / MMars Studio, Almaty, KZ

JUL 2016 – AUG 2018

- Built multiple MVPs and production apps: a social network with maps and anti-radar, an audio/video recording app (ExoPlayer + caching), an XMPP messaging app (Smack API), and a cross-platform 3D map in Unity integrated into Android and iOS.

Stack: Kotlin, Java (MVP), Unity, Google Maps, RxJava2, Retrofit2, OkHttp, CameraX, ExoPlayer, XMPP

SKILLS

Languages: Kotlin, Java · Async & Reactive: Coroutines, Flow, RxJava2

UI: Jetpack Compose, Material Design, Figma · Architecture: Clean Architecture, MVI, UDF, MVVM, MVP

Jetpack: Room, WorkManager, Paging, Navigation · Integrations: Google Play Billing, Google Maps, Firebase (A/B)

Tooling & CI/CD: Git, GitLab CI, GitHub Actions · Testing: Unit, UI, Integration (JUnit, Robolectric, Mockito, Espresso)

Practices: Code Review, Mentoring, Team & Tech Leadership · AI: Prompt engineering (ChatGPT, Claude, custom LLMs)

Spoken: Kazakh (native) · Russian (native) · English (upper-intermediate)

EDUCATION

BSc in Heat Power Engineering | Almaty, Kazakhstan · Certificate: Google Compose Camp

ACHIEVEMENTS

- Telegram Contests — 5 contests entered: 2 Honorable Mentions and a 4th-place finish (latest July 2025).
